ELSEVIER

International Journal of Coal Geology 28 (1995) 343

International Journal of coal geology

Contents Volume 28, 1995

Mechanisms of graphite formation from kerogen: experimental evidence
R.M. Bustin, J.V. Ross and J.-N. Rouzaud 1
Lithotype sequences in the Early Miocene Maryville Coal Measures, New Zealand
P.J. Crosdale 37
Quantitative X-ray diffraction analysis of mineral and organic phases in organic-rich rocks
A.J. Mandile and A.C. Hutton 51

Delineation of the distinctive nature of Tertiary coal beds
J.C. Shearer, T.A. Moore and T.D. Demchuk 71
Biological processes controlling the development of modern peat-forming ecosystems
P.D. Moore 99
Petrological and organic geochemical investigation of recent peats with known environments of deposition
J. Dehmer 111
The role of palynology in paleoecological analyses of Tertiary coals
D.J. Nichols 139
Dispersed angiosperm cuticles: Their history, preparation, and application to the rise of angiosperms in Cretaceous and Paleocene coals, southern western interior of North America
G.R. Upchurch, Jr. 161
Palaeohistological studies on Miocene brown coals of Central Europe
W. Schneider 229
Sequence stratigraphic analysis and the origins of Tertiary brown coal lithotypes, Latrobe Valley, Gippsland Basin, Australia
G.R. Holdgate, A.P. Kershaw and I.R.K. Sluiter 249
Biogeographic, ecological and stratigraphic relationships of the Miocene brown coal floras, Latrobe Valley, Victoria, Australia
I.R.K. Sluiter, A.P. Kershaw, G.R. Holdgate and D. Bulman 277
Petrography, geochemistry, and depositional setting of the San Pedro and Santo Tomas coal zones: Anomalous algae-rich coals in the middle part of the Claiborne Group (Eocene) of Webb County, Texas
P.D. Warwick and R.W. Hook 303

VOLUME 28 NOS. 2–4 **SPECIAL ISSUE**

TERTIARY-AGE COALS — GSA SYMPOSIUM
T.D. DEMCHUCK, J. SHEARER AND T. MOORE (EDITORS)

Contents

Delineation of the distinctive nature of Tertiary coal beds
